

## AJUGA Party Colors ('Binparcol')

Origin: Bred by English plantsman, Mike Tristram

Species: *Ajuga reptans*

Protection Status: US Plant Patent #20,293

### Characteristics:

'Party Colors' is a sport of Ajuga 'Burgundy Glow' with differences in the direction of 'Black Scallop' in the rounder, thicker leaves and color balance changes. 'Party Colors' is less vigorous but has very attractive markings with plenty of cream round the edges. The leaves are much bigger, rounder and thicker than 'Burgundy Glow'. Great for edging, evergreen groundcover, living mulch, and containers in part to full shade.

Hardiness: Parent is hardy to USDA Zone 3.

Bloom: Violet-blue flowers from spring to early summer.

Foliage: Green, pink, and white; evergreen.

Habit: Dense and compact, but spreading in habit

Propagation: By tip cuttings and division. *License required for propagation.*

Culture: Sun to full shade, regular water, and moisture retentive soil.
