

ARTEMISIA 'Oriental Limelight'

Origin: Selected by English plantsman Richard Harnett of Kenrock Park Plants.

Species: *Artemisia vulgaris*

Protection Status: US Plant Patent # 12,788. Canadian PBR Granted.

Characteristics:

'Oriental Limelight' is a variegated form of Artemisia with greens, golds, and creams. Best used contained within a pot, it forms dense mounds in mixed containers, in the back of the perennial or annual border.

Hardiness: USDA Zones 3-9

Bloom: Non-showy flowers

Foliage: Variable but stable variegation of bright cream to gold on bright green foliage

Habit: Dense shrubby mound, up to 2' tall and wide

Propagation: Tip Cuttings. *License required for propagation.*

Culture: Fertile, well-drained soil in full sun. Best if flowering spikes are removed.
