

## **CERATOSTIGMA 'My Love'**

**Origin:** Bred by English Plantsman Peter Catt of Liss Forest Nursery.

**Species:** *Ceratostigma x willmottianum*

**Protection Status:** US Plant Patent: # 19,269; COPF Open

### **Characteristics:**

This wonderful plant is from the well known international hybridizer Peter Catt. Many of his plants are already in commerce in North America. **'My Love'** was bred for several outstanding characteristics: intense golden foliage, compact growth and beautiful clear blue flowers. It is proving to be a prolific bloomer. **'My Love'** keeps its golden color throughout a European summer. This plant is an improvement on 'Forest Blue' in that it is more compact and robust. These features make it suitable as a single species container plant and good for a small garden.

**Hardiness:** Zone 7 to 9, (Zone 6 if protected in winter)

**Bloom:** Clear blue

**Foliage:** Intense golden color

**Habit:** Compact

**Propagation:** Semi-ripe cuttings. *License required for propagation.*

**Culture:** Well-drained soils in full sun or partial shade. Drought tolerant. Does not like wet feet.
