

# PLANTHAVEN<sup>®</sup> – *From Breeder to Market*

PLANT VARIETY INFORMATION SHEET FOR:

## CONVOLVULUS “BLUE CASBAH”

**ORIGIN.** Selected from a growing crop of *Convolvulus sabatius* on an Australian commercial nursery

**SPECIES:** *Convolvulus sabatius*

**PROTECTION STATUS:** ‘Moroccan Beauty’ US PP #15,104; Selling name “Blue Casbah”.

### CHARACTERISTICS:

This selection is a more compact form of the normal *C. sabatius*, more branched and carrying more flowers. It is claimed to be not invasive by the breeder. The common *sabatius* needs pruning but there is no need to prune this selection, which saves time and labor. Its habit is flat and cascading. This plant is suitable for rock gardens, containers, hanging baskets and performs well in hot & windy sites. It is low maintenance plant for the consumer.

**HARDINESS:** USDA zones 7 - 10

**BLOOM:** pale mauve, approx 3cm across

**FOLIAGE:** same as the species

**HABIT:** flat, compact growth and will cascade

**PROPAGATION:** cuttings

**CULTURE:** as per *convolvulus*
