

Whetman® DIANTHUS Star Series –

Semi and Double flowers

Origin: Devon, England: Professional Dianthus breeding program

Species: *Dianthus hybrid*

Protection Status: US Plant Patents Granted or Pending, Canadian PBR Pending; COPF Open

Characteristics:

- Compact mounding foliage, typically 7" height and spread at peak bloom time.
- Foliage is fine and generally glaucous.
- Single flowers 1" – 1.5" diameter, held 3" above foliage.
- Day neutral, perpetual flowering, heavily budded in spring; vernalization not necessary.
- Varying degrees of perfume, somewhat reminiscent of cloves.
- Ideal for use as a front of the border perennial or in mixed containers.
