For Immediate Release

Dianthus Coral Reef

Santa Barbara, California, February 22, 2012 – Dianthus Coral Reef is a new Scent First® Pot selection from Whetman® Pinks, the UK's leading breeder and propagator of award winning perfumed Dianthus with a worldwide reputation for quality. **Coral Reef** has a gorgeous mass of spicy fragrant deep coral flowers with white picotee on short sturdy stems. The Scent First® series produce amazingly fragrant, bushy, prolific, perpetually flowering plants. The glaucous foliage forms a unique compact habit with a height and spread of 8-10". No vernalization is required for blooming. Dead head and feed regularly to encourage fast repeat blooming from May through September. **Dianthus Coral Reef** is ideally suited for containers, borders, mass landscape planting, or cut flowers. Whetman® Dianthus are renowned for their cold and drought tolerance and are truly the benchmark of Dianthus breeding.
