**For Immediate Release**

### **Dianthus Starburst**

**Santa Barbara, California, August, 29, 2011** – Dianthus Starburst ('WP07YETIS') is a unique Whetman® Dianthus selection ideal for end cap retail promotions. This exceptionally pretty and unusual dwarf Dianthus has delightful art deco patterned semi-double flowers with cherry red and white stripes that look like old-fashioned humbug sweets. Starburst has a long flowering period - from April to October and will grow well in a sunny spot in well-drained soil. Deadhead spent blooms regularly to encourage further flowers. Starburst is compact with a tidy mounding habit approximately 7" x 7" of grey-green foliage. Starburst is Zone 5 hardy and requires no vernalization. This gorgeous beauty is versatile enough for edging, mass plantings and is ideal for patio containers and rockeries.

For more information about Dianthus Starburst, visit [www.planthaven.com](http://www.planthaven.com) or email [new.plants@planthaven.com](mailto:new.plants@planthaven.com).
