

HELLEBORUS Ivory Prince ('Walhelivor')

Origin: Ivory Prince was bred by David Tristram in the UK

Species: *hybridus* (complex)

Protection Status: US Plant Patent #16,199; COPF Open

Characteristics:

'Ivory Prince' is a perennial that exhibits vigorous growth, tidy upright habit, large ivory-white flowers, contrasting burgundy-pink buds, and medium-green leaves. The distinguishing characteristics that make 'Ivory Prince' unique are crop uniformity, vigorous growth rate, tidy plant habit and well presented flat ivory-white flowers that gradually turn pink, then age to green. 'Ivory Prince' exhibits prolific flowering with six spikes of twelve flowers each, on a 1-gallon container plant at 2-years-of-age. Finally, The Prince is readily propagated in vitro and readily rooted ex vitro.

Hardiness: USDA Zone 5.

Bloom: Large flat ivory-white flowers, with green markings, that later turn pink, and age to green in color.

Foliage: Medium green leaves.

Habit: Mature height around is 46 cm. in height and 51 cm. in width at 2-years-of-age.

Propagation: Tissue culture. *License required for propagation*

Culture: Well-drained soil. In full sun, keep moist and fertilized.
