

NEMESIA Lemon Mist Sachet ('Pendrop')

Origin: From noted UK growers

Species: *Nemesia x hybrida*

Protection Status: US Plant Patent #20,268

Characteristics:

This cheerful charmer is another variety from a prestigious breeding program. **Lemon Mist** has fragrant purple and white flowers with a very prominent yellow palate. The flowers are sterile and bloom profusely from spring through autumn. The stems are short resulting in a tidy compact habit. A mature plant is approximately 7" x 7". This will be a lovely addition as a specimen or mixed planting in a container or in the landscape in a border.

Hardiness: USDA Zone 6

Bloom: Fragrant purple and white flowers with a prominent yellow palate.

Foliage: Soft green foliage.

Habit: Compact 7" x 7"

Propagation: Vegetative cuttings. *License required for propagation.*

Culture: Moderately fertile soil in semi-shade to full sun.

Use: Pots, patio containers, planting in an open border.
