

Phormium ‘Jubilee’

Key Features

- ✓ Striking cherry red foliage margins.
- ✓ Upright-arching habit.
- ✓ Excellent impulse line.

Characteristics

Genus & Species:	<i>Phormium hybrid</i>
Protection Status:	PP 19,059; COPF Open.
USDA Zone:	USDA Zone 8. (15°F or -12°C).
Bloom:	Foliage selection. No bloom recorded to date.
Bloom Period:	N/A.
Foliage:	Striking cherry red foliage margins to the fresh green foliage.
Habit:	Tight clumping habit. Foliage is upright-arching. 48" x 72".
Propagation:	Division. <i>License required for propagation.</i>
Culture:	Best grown in part shade. Feed regularly with high nitrogen.
Additional Comments:	Plants will exhibit best color when grown in part shade & fed weekly with a well balance fertilizer high in trace element. Remove old foliage at the base & keep in active growth. Plants will loose color with age if not tended correctly.
Uses:	Containers, Borders, Mass Landscape Planting.

Approximate Finishing Time

Gallon:	6months from a Quart (Spring Planting).
5 Gallons:	24months from a Quart (Spring Planting).

Closest Variety: *P.* ‘Jester’

Key Differences:

- ✓ ‘Jubilee’ cherry red margins **vs.** cherry red central variegation.
- ✓ ‘Jubilee’ more stable **vs.** less stable.
- ✓ ‘Jubilee’ upright-arching habit **vs.** arching habit.

PlantHaven Disclaimer: These Grower Notes are based on our experience with this crop. Growth will vary depending on location, climate, growing medium and cultural practices. Where fertilizer & chemical use is involved, read the labels, follow the manufacturer’s instructions & practice careful trialing methods.

Note: All PlantHaven varieties are subject to patent protection: unlicensed propagation prohibited.
