

# PlantHaven Royal Hawaiian® Colocasia

Here is your chance to shape the future. PlantHaven would like to know your thoughts on these five new experiments from the exciting breeding work of Dr John Cho at the University of Hawaii.

All five have been bred for:

- ✓ Excellent vigor / disease resistance.
- ✓ Improved cold tolerance / hardiness. USDA Zone 7b-11. (5°F or -14°C).

Use the response form provided to let us know if you think these new selections are

- Outstanding
- Average
- Poor

We would also love to know which ones you think will be top sellers. Please rank them 1-5 (1 being top sellers).

The 5 New Experimentals are:

## 1. Colocasia Royal Hawaiian® Experimental 2005-21

### Key Features

- ✓ Ruffled chartreuse foliage with burgundy veining and petioles.
  - ✓ Medium sized, tight clump forming habit, 60" x 36".
  - ✓ Great impulse plants with a long period of seasonal interest.
- USDA Zone: Zone 7b-11. (5°F or -14°C).

### Approximate Finishing Time

6" Gallons: 12-16 weeks

## 2. Colocasia Royal Hawaiian® Experimental 2006-147

### Key Features

- ✓ Glossy dark black foliage held on dark petioles.
  - ✓ Medium sized, tight clump forming habit, 60" x 36". A more compact and more black 'Diamond Head'.
  - ✓ Great impulse plants with a long period of seasonal interest.
- USDA Zone: Zone 7b-11. (5°F or -14°C).

### Approximate Finishing Time

6" Gallons: 12-16 weeks

## 3. Colocasia Royal Hawaiian® Experimental 2006-329

### Key Features

- ✓ Unique, strongly ribbed foliage, mat green with prominent lemon yellow vein on burgundy tinted petioles. First of a new series of the "veined" leaf effect.
  - ✓ Medium sized, tight clump forming habit, 60" x 36".
  - ✓ Great impulse plants with a long period of seasonal interest.
- USDA Zone: Zone 7b-11. (5°F or -14°C).

### Approximate Finishing Time

6" Gallons: 12-16 weeks

## 4. Colocasia Royal Hawaiian® Experimental 2007A(203x6-2)

### Key Features

- ✓ Green to light green variegated leaves with green-cream striped petioles.
  - ✓ Compact medium sized, tight clump forming habit, 60" x 36".
  - ✓ Great impulse plants with a long period of seasonal interest.
- USDA Zone: Zone 7b-11. (5°F or -14°C).

### Approximate Finishing Time

6" Gallons: 12-16 weeks

## 5. Colocasia Royal Hawaiian® Experimental 2008-30

### Key Features

- ✓ Mature leaves are glossy & dark purple to black with green venation. A real breeding breakthrough.
  - ✓ Compact, small to medium size with a tight clump forming habit, 48" x 24".
  - ✓ Multi-shooted plant and excellent for containers.
- USDA Zone: Zone 7b-11. (5°F or -14°C).

### Approximate Finishing Time

6" Gallons: 12-16 weeks
