

PlantHaven Shrub Program

PlantHaven is pleased to launch five outstanding Berberis varieties from Michal Andrusiv in the Czech Republic. All five varieties have been trialed extensively throughout the U.S. and have performed exceptionally well in all climate zones.

As with all new barberries, the varieties were held in quarantine for wheat rust testing at the USDA Cereal Disease Laboratory in Minnesota for more than 2 years. All five varieties were found to be rust resistant. Six plants of each variety were finally released back to us in 2006! Now, four years later, we are able to showcase these outstanding varieties from Mr. Andrusiv's world-class Berberis breeding program.

These exciting plants will be available exclusively from members of the PlantHaven Shrub Program.

For more information on the program please contact - PlantHaven Shrub Program Manager, Keith Manbeck. Email: keith.manbeck@planthaven.com

Berberis Admiration

Key Features
